ACCENTURE

Dec 2023 – July 2026 | Hyderabad

Senior Analyst

Project: TotalEnergies (France) – SEQUANA

- Developed and maintained SAP UI5 custom, standalone and Fiori Elements applications using SAPUI5, OData, and CAPM.
- Migrated 30+ applications from SAP Neo to Cloud Foundry.
- Deployed applications on SAP BTP, SAP Work Zone, and SAP Build Code.
- Integrated secure backend services and implemented role-based authorizations using SAP BTP.
- Collaborated on CI/CD pipelines and deployment activities using Git and DevOps practices.
- Optimized application performance using efficient data binding and scalable UI architecture.
- Developed and enhanced ESS and MSS Fiori applications.
- Supported HR processes, approvals, employee management workflows, and role-based authorization.
- Integrated frontend applications with backend OData services.

TCS

Mar 2022 – Dec 2023 | Hyderabad

System Engineer

Project: H&M; (Sweden)

- Built SAP Fiori Elements applications including List Report, Object Page, Overview Page and customer dashboards.
- Supported Fiori upgrades, regression testing, unit testing and post-upgrade issue resolution.
- Developed and extended SAP standard applications using SAPUI5 and OData.
- Configured and mapped SAP GUI T-Codes to Fiori Launchpad tiles.
- Used semantic objects, target mappings and role-based catalogs/groups.
- Managed FLP tile configuration and navigation.
- Enabled secure access to backend transactions.

- Improved UI responsiveness through performance tuning and model optimization.

TELEPERFORMANCE

Nov 2020 – Feb 2022 | Hyderabad

Associate Software Developer

Project: Marks & Spencer (UK)

- Collaborated with senior developers to deliver SAPUI5 applications using agile delivery practices.
- Developed custom SAP UI5 applications using XML views and fragments.
- Worked with Smart Controls.
- Implemented responsive tables, dialogs, filters and charts.
- Integrated frontend applications with OData V2 services.
